

## Knowledge sharing in Company

This survey explores different aspects of how knowledge sharing currently works in Company. This is a first step in looking at how Company can embrace continuous improvement as an Agile and Lean organization. Please answer all the questions as honestly as possible as this will help us to improve. The survey is divided into 3 sections – About your current main project, About knowledge sharing, and About your job responsibilities.

This survey is being conducted by an independent research group, the [Agile Research Network](#).

The survey is anonymous and no personal data is collected. Only members of the research group will have access to the survey data. Aggregated results will be shared with Company and used to write research papers of interest to Agile practitioners and academics.
